

Computer!

Don't get sick

The game has two jobs (designer, developer) to choose from.

It is a game that defeats the program and the language baddies for the job.

For example, designers are examples of Photoshop, illustrator villains, developers C language, Python villains.

Defeat the villains and protect your computer from errors!

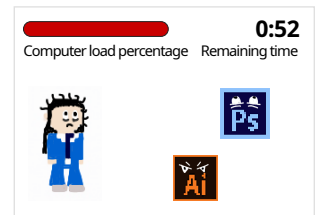

1. Target Player

Students at the Sejong Campus at Hongik University.
Especially students who want designers and developers.

2. Game UI description

<Start screen>

<Game main screen>

3. Objects or Characters

Designer

Developer

PS

AI

Visual
Studio

Python
Idle

3. Tutorial
